

Are you or someone you know experiencing agitation associated with Alzheimer's disease?

We are conducting a new study that aims to improve symptoms of agitation in Alzheimer's disease. You or someone you care for may be eligible for this study.

We are looking for volunteers who have a diagnosis of Alzheimer's disease and are experiencing any of these symptoms of agitation:

- Feelings of irritability
- Restlessness
- Fidgeting and pacing
- Difficulty cooperating with others
- Frustration or anger

Participants must have a study partner who can participate in the study with them. All participants will receive psychosocial counselling and compensation for their time.
