Instructions: Find the hidden equestions! Circle each one and solve it using the operators addition **+**, subtraction **−**, multiplication **×**, division **÷**, and equals **=** (see above: **4 + 2 = 6**). Get started by searching left to right, one row at a time. You can make it more challenging by working vertically, diagonally, backwards, or using two-digit numbers, for example (**2 × 4 + 6 = 10 − 3 × 2**).
