

Candy Cane Candle Holder

Glue candy canes to a wine cork to make a candle holder perfect for battery-operated candlesticks. Display on a shelf or ledge outside your door.

You will need:

- [Battery-operated pillar candle](#)
- 2 AA batteries
- 11 candy canes (standard size)
- Wine cork
- Hot glue gun
- Raffia

Display a photo of a completed [Candy Cane Candle Holder](#) to attract crafters.

Directions:

1. Hot glue the 11 candy canes, one by one, onto the cork. Position the bottom of the cork about 2" from the curved ends of the candy canes. You will notice the canes are not the exact same length. To ensure your candle holder sits level, be sure the curves of the canes are flush to one another.

2. When all the candy canes have been attached, wrap your holder with raffia and tie a bow.
 3. Place a battery-operated candle in your clever candle holder.
