

### Smiley Face Mask

Spruce up a disposable face mask by printing and cutting out one of the many silly grins we've provided.

#### You will need:

- [Smiles](#) printed in color on copy paper
- Disposable mask
- Glue Dots (permanent tack)
- Scissors

Display a photo of a completed [Smiley Face Mask](#) to attract crafters. Make a few masks for staff to model.

#### Directions:

1. Cut the funny smiles apart. Select one and cut it out along the outer edge.

2. Turn over the smile and apply two Glue Dots to the top as shown. Attach the paper to the top edge of your mask. Wear it while out and about or just for giggles. **Tip:** Don't glue the bottom of the smile to the mask. It will make the mask less flexible and harder to speak and breathe through.
