1. Introduction

The Alzheimer Society Research Program (ASRP) is a successful initiative, within which all regional Alzheimer Societies, the Alzheimer Society of Canada (ASC), partners and donors all collaborate to support research that both alleviates the personal and social consequences of dementia and brings us closer to a world without dementia.

The ASRP provides grants and awards to support Canadian studies that promise new insights into causes, risk reduction, diagnosis, treatment and management of Alzheimer's disease and other dementias.

Awards

- **Doctoral Awards** provide an opportunity for promising individuals pursuing a PhD, or combined master's degree and PhD, to begin the process of becoming future independent investigators in the field of Alzheimer's disease and other dementias.
- **Postdoctoral Awards** are for graduates with a PhD or MD who wish to gain additional research experience within an established research environment.

Grants

- **New Investigator Operating Grants** are designed to help launch the careers of outstanding researchers who are within the first six (6) years of their initial academic appointment.
- **Proof of Concept Grants** are designed to fund innovative, potentially high-challenge, and high-reward research that pushes the boundaries of our existing understanding of dementia.

The various awards and grants are described in detail in Section 3.

The ASRP supports an open competition. With an aim to support research that will improve the lives of people with lived experience of dementia (people living with dementia and/or caregivers, and Alzheimer Society client services staff), the ASRP invites applicants from all disciplines to apply. Eligible proposals may be cross-cutting or interdisciplinary in nature. Priority will be given to applications that will have a significant impact on the lives of people living with dementia and caregivers.

1.1. Confidentiality

The ASRP and all documents and information provided for the purpose of peer review are subject to the conditions of the Privacy Act and Access to Information Act. All information contained in applications, internal and external reviews, and panel discussions is highly sensitive. As such, all Panel Members (Peer Reviewers, Citizen Reviewers and Relevancy Reviewers), Alzheimer Society Staff and Observers will not discuss with applicants or reviewers any information relating to the review of a specific application. Therefore, the applications and any discussions thereof are treated as strictly confidential and may not be used for any purpose beyond that for which they were originally intended. All materials related to the review process are stored in a secure manner to prevent unauthorized access. They are transmitted using secure carriers and technologies. When they are no longer required, paper documents must be destroyed using a secure method such as shredding or returned to ASC for destruction, and electronic documents must be deleted.

1.2. Conflict of Interest

All Panel members and Observers are required to sign a CONFLICT-OF-INTEREST DECLARATION.

The ASRP makes every effort to ensure not only that decisions are fair and objective, but also that they are seen to be so. Individual panel members are asked to avoid any actions that might give the appearance that a **conflict of interest** exists or could reasonably be viewed as affecting their objectivity. When a reviewer is uncertain as to whether a conflict exists, they shall inform ASC of the potential conflict, in writing, and ASC will make the final decision as to whether they may appropriately review certain ASRP applications.

The ASRP follows the direction of the [Tri-Agency's Responsible Conduct of Research](#), which describes the policies and requirements for applying for research funding, managing funds, conducting research, and disseminating results. ASC implements rigid assessments of **conflict of interest** amongst its peer reviewers, donors, and external reviewers, to eliminate any potential risks that would pose a threat to the integrity of the research, the researcher or the Alzheimer Society and its affiliated partners. **Conflicts of Interest** may arise when a partner's interests and intent towards an area of research intersects with any personal, commercial, or financial interest or benefit pertaining to the individual, their employment, their partnerships and their former or prospective professional associations. Conflicts may also arise when activities or situations place an individual—such as a researcher—in a real, potential, or perceived conflict between the duties or responsibilities related to research and personal, institutional, or other interests.

1.3. SurveyMonkey Apply

All applicants are required to submit online applications through the Alzheimer Society of Canada SurveyMonkey Apply platform, (English: asc.smapply.ca / French: asc.smapply.ca/lang/?lang=fr). To download PDF copies of the application forms and other available resources, click on the **Pages – Resource Files tab** in the top menu bar of the applicant dashboard.

Please note, the main grant/award forms are multiple pages in length. To complete the full online application form, applicants must select “**next**” to move to the next page. The last page of the main application form will display a “**complete**” button. Applicants must select “**complete**” and the official “**submit**” button for official submission of their ASRP application.

2. General provisions

The procedures outlined in this section apply to all the funding categories described in Section 3 below; individual funding categories should also be reviewed for additional requirements and information specific to those categories.

Grants and awards are intended to support researchers based in a Canadian university or affiliated institution and are not provided to support research sponsored by for-profit organizations.

2.1. Submission procedure

The ASRP does not accept applications and supporting documents via mail or email. All applications (LOI and full application submissions) and supporting documents must be submitted online through ASC's Survey Monkey Apply portal (English: asc.smapply.ca / French: asc.smapply.ca/lang/?lang=fr). **All applications must be submitted by November 3, 2025, 5 PM EST. LOI submissions for the Proof-of-Concept grants stream were due July 21, 2025.**

Incomplete applications will not be processed.

2.2. Review criteria and process

Société Alzheimer Society

Applications are reviewed by groups of experts, which include researchers and **citizen reviewers**, who are people with lived experience of dementia, through a peer review process.

Applications are evaluated on the basis of scientific merit, novelty, clarity, and their relevance to Alzheimer's disease and other dementias.

Within their role, **citizen reviewers** will evaluate the importance, clarity, and relevance of the *lay summaries* for each application received through the ASRP competition. In reviewing for relevance, the citizen reviewers will consider the following:

- The project's relevance to a person living with dementia,
- The project's relevance to a caregiver,
- The project's relevance to client services staff (nurses, social workers, dementia educators, etc.)

The final decision on funding is made by the ASC Board of Directors following recommendations by the Research & KTE Committee. Copies of reviewers' reports, peer review scores and ranking are provided to applicants following the panel meetings. Final letters of offer are sent out at a later date. ASC does not enter discussion on specific items in the reviews provided to applicants, on reasons for the rejection of applications or on budgetary modifications made by the Review Panels. ASC makes every effort to ensure the confidentiality of each application.

2.3. Notification and acceptance

Official notification of results is provided in the spring of the year following the submission date. These results are transmitted to the applicants electronically and will be posted on ASC's website. It is the applicant's responsibility to ensure that ASC is provided with a current email address and to notify the Research Department of any updates that need to be made to the contact information provided in the original application. Within ten (10) business days of their receiving the result of their application electronically, successful applicants must notify ASC electronically that they are accepting the offer; failure to comply with this requirement may lead to withdrawal of the offer. Unless there are exceptional circumstances approved by ASC, the grant/award must be taken up on the first of any month between July 1 and October 1 of the first funding year. The business officer of the university or institution concerned is informed of the details of the grant/award upon its initiation.

2.4. Other funding sources

Full disclosure of other grants and/or awards currently held or applied for, and any relevant agreements that pertain to the application (including university-provided start-up funds), must be made at the time of application. Copies of the summary page(s) from the application(s) that generated these grants/awards, together with the page(s) describing the funds requested and the funds awarded must be included in the application to the ASRP. Explicit and detailed descriptions must be provided as to any overlap between an application to another agency and that to the ASRP. Applicants who do not hold current grants and/or awards and have not submitted applications to other agencies are also required to indicate this. *Applications will not be reviewed if the requested information pertaining to other ongoing or applied-for funding sources is not provided.*

ASRP award/grant recipients may not concurrently hold another award comparable to the funding offered by the ASRP. Applicants who have been offered other support are requested to consult ASC Research Department (research@alzheimer.ca) as soon as possible. If funding is accepted from other sources for the same project as the ASRP award, ASC must be immediately notified; the ASRP award may be revoked or revised. In the event that funding being offered from the other source is of a lesser value, a top-up may be considered whereby the awardee will be permitted to hold the additional award, provided that the total monthly value of the award

Société Alzheimer Society

during the period of overlap with the ASRP award, does not exceed 50 per cent of the monthly value of the ASRP award. Awardees are permitted to hold additional awards provided that their total annual value does not exceed 50 per cent of the ASC award that has been offered.

ASRP award/grant recipients are required to notify any other granting agencies with whom they have pending award application(s) of the acceptance of this ASRP award, and to provide the granting agency with the summary of their ASRP proposal.

During the period of ASRP funding, any changes that pertain to an overlap in funding with another agency must be reported as soon as possible to ASC. ASRP grants and awards will not be made to an applicant who is already funded through the ASRP (as the **principal investigator** on a grant or as an **awardee**) unless that funding expires before the new grant/award would begin, regardless of the specific area of research involved. Renewal applications will not be accepted.

2.5. Payment

Funds for all ASRP grants and awards are administered through the finance officer of the university or institution concerned. Payments are made in quarterly installments using **Electronic Funds Transfer (EFT)**, according to the start date of the grant/award.

Progress reports and financial reports are required at the end of each year. Financial reports are to be in the standard financial report format used by the finance office of the host institution. It is the responsibility of the applicant to keep track of all reporting requirements.

Note: Failure to provide annual reports may result in a delay or a stoppage in the release of further funds. ASC will contact the institution's finance administrator and supervisor (if applicable) should payments be suspended. In the event of any outstanding final reports, ASC reserves the right to refuse any subsequent applications for funding.

2.6. Transfer

ASRP grants and awards are made for research or training at the universities or institutions specified in the application. Transfer of a grant or award to another institution to which the grantee/awardee has relocated may be allowed at the discretion of ASC and, if applicable, the sponsoring provincial/territorial body, donor, or partner. Training awardees may not change supervisors without the permission of ASC.

2.7. Closing

Should an awardee be unable to continue the research or training program for which they are receiving support, ASC should be notified immediately, and provisions be made for the return of unexpended funds.

2.8. Leaves of absence

Recipients requesting a leave of absence must provide a written statement explaining the reason for their request at least 3 months before their anticipated date of leave. A timeline of when they expect to resume their project and confirmation from the supervisor acknowledging the statement (if applicable) is also required. It is the practice of ASC to suspend a grant or award for the duration of a parental leave of absence, which can be taken for a period of up to 12 months. The ASRP grant/award will be prorated and will continue to be paid until the last official day at the host institution before the leave has begun. The grant/award will be suspended for the duration of the leave and shall recommence when, and if, the grantee/awardee returns to the host institution. Upon return to active status, ASC will require written confirmation from the grantee or supervisor (for doctoral and postdoctoral awards) verifying an active return to the project and registration at the host

institution (for doctoral awards). Once this has been received, funding will recommence. Other leaves of absence will be considered on a case-by-case basis.

2.9. Extensions

ASC will allow extensions for awardees/grantees to use funds remaining in their account, for a period of up to 12 months past the expiry date of the award/grant. A formal request for an extension must be submitted to ASC at least two months before the funding expiry date, explaining the basis of the request. A detailed financial statement from the institution's Finance Administrator is also required to support a request for an extension. It is the responsibility of the grantee/awardee to inform co-investigators and other concerned individuals of the outcome of extension requests.

2.10. Eligibility

The principal investigator (*and any co-investigators*) on a research grant must be based in, or be an independent researcher (e.g., professor, associate professor, assistant professor, and professor emeritus) with a Canadian university or affiliated institution (i.e., teaching hospital). Lay people with lived experience of dementia are eligible to serve as co-investigators on a grant application but are not permitted to apply as a principal investigator. A researcher based outside of Canada would be eligible as a co-investigator only if their participation in the project occurred entirely in a Canadian university or affiliated institution. These conditions apply also to doctoral and postdoctoral supervisors.

2.11. Co-investigators and collaborators

In accordance with the definitions provided by the Social Sciences and Humanities Research Council (SSHRC) and in line with the Canadian Institutes of Health Research, a co-investigator is defined as an individual, participating in a grant application, who makes a significant contribution to the intellectual direction of the research or research-related activity, who plays a significant role in the conduct of the research or research-related activity, and who may also have some responsibility for financial aspects of the research. A collaborator is an individual, participating in a grant application, who may make a significant contribution to the intellectual direction of the research or research-related activity, and who may play a significant role in the conduct of the research or research-related activity.

2.12. Engagement of people with lived experience of dementia

All applicants are strongly encouraged to include people with lived experience in their research and provide an explanation of their involvement. People with lived experience include people living with dementia and/or their caregivers. People with lived experience can be involved at any stage of the research project, e.g., as collaborators/co-investigators in design, as participants, etc. If an applicant does not plan to include people with lived experience in their research, they must provide justification as to why they are not included. Further details and examples of the engagement of people with lived experience can be located on the Pages – Resource Files section of the asc.smapply.ca application portal.

2.13. Host institution/location of research

The host institution must take full responsibility for the conduct of the research being funded, in accordance with all ASRP policies. These include maintaining integrity in research and scholarship, full ethical review and surveillance, compliance with accepted biohazard and animal care regulations, and full financial accounting and control.

2.14. Ethics and safety certificates

Responsible Conduct of Research (RCR) is at the cornerstone of the ASRP's commitment to excellence in

Société Alzheimer Society

dementia research. As such, the ASRP is committed to the [Tri-Agency Framework for Responsible Conduct of Research](#). The ASC, in its administration of the ASRP, follows this framework's policies and requirements in the management of its funds, research performance and dissemination of research results.

At the time of application, the applicant, the President (or Principal of Institution), the Head of the Department, and the Dean of Faculty (or Director of Institution), must sign a statement indicating that the proposal will be reviewed by the appropriate ethical review committee prior to the commencement of the project. Funds will not be released until ASC has received copies of all necessary ethical and safety certificates.

In the case of animal experimentation, lab procedures must be consistent with the Guiding Principles enunciated by the Canadian Council on Animal Care.

In cases of human research, the proposed research must be reviewed in a manner which conforms to the guidelines as outlined by the Tri-Council Policy Statement, "Ethical Conduct for Research Involving Humans."

When observations are being made on the behaviour or lifestyle of participants either in home or community settings and/or information is being requested of caregivers or health professionals involved, the applicant must indicate within the proposal that issues of privacy and confidentiality will be discussed with these individuals and that written agreement will be obtained.

Where biological and chemical hazards are involved, documentation must be provided demonstrating that the procedures meet the requirements as outlined in Health Canada's Laboratory Biosafety Guidelines.

For awards, the supervisor is responsible for signing the application form indicating that all appropriate ethical guidelines will be met.

2.15. Progress, Financial and Final Reports

The ASRP relies on the generous contributions of its members, regional Alzheimer Societies and the general public for funding. It is very important that the Society be able to report to its partners about the research their contributions fund. Progress and Financial reports are due 30 days after the end of each interim grant/award funding year (i.e., for funding longer than one year). Final reports are due 60 days after the end of the final grant/award funding year. A final financial report must also be submitted within 60 days of receipt of final payment.

Reports must be completed on the applicable [Progress/Final Report form](#), available through the ASC website.

An important component of the progress and final reports is the **lay summary**. These summaries may appear on ASC's website and are made available to the regional Alzheimer Societies and, where applicable, to the partner co-funding the application. *It is important to the objectives of the Society and its partners, and to the expectations of our constituents, that these summaries be understandable by laypeople.* ASC reserves the right to make editorial amendments to summaries which will be returned to the grantee/awardee for review.

2.16. Research-related activities

Involvement with regional Alzheimer Societies

Donors and members of the general public are interested in local research on dementia, and all recipients are encouraged to be in contact with their regional Alzheimer Society. *Acceptance of an ASRP grant/award is understood to indicate that during the tenure, or after it has ended, the grantee/awardee may be invited to present their findings to their regional Alzheimer Society.* Information regarding contact with the recipient's regional Alzheimer Society will be provided in a *Welcome Letter*, a few months following the initial ASRP grant/award offer acceptance.

2.17. Open access policy

Société Alzheimer Society

Open access: The Alzheimer Society of Canada is committed to promoting and increasing access to the results of ASRP-funded research, to further the awareness and the use of research results by policy makers, health care administrators, clinicians and the public. Open access will allow for a broader dissemination of knowledge, with the potential of increasing the impact of the research results that are shared. Through the ASC Open Access Policy, researchers are encouraged to make their work publicly available in archives such as PubMed Central, the researcher's host institution website, and/or open access journals.

The Alzheimer Society of Canada believes that unrestricted public access to research findings is a crucial part of upholding the values and responsibilities of the ASRP. Open access allows for wider audiences to be reached which will ultimately promote research advancement which is integral to the ASC mission. Our Open Access Policy Requirements are as follows:

- I. ASRP recipients are to make their articles "open access" immediately at the time of acceptance.
- II. ASRP recipients are to prepare a 500-word summary of their publication which can be posted on the ASC website or published in a newsletter for the public.

Please note that ASRP applicants may utilize funds from their grant or award to cover open access publication fees.

All public presentations of the research findings and all journal publications must be reported to ASC. A reprint of each publication must be forwarded to ASC. Grantees/awardees are required to advise ASC prior to scheduled press releases or major media events, and as soon as possible following a journal publication of ASRP-supported studies, so that ASC can appropriately highlight the researcher and their research.

2.18. Knowledge translation and exchange (KTE) support

Sharing research findings resulting from ASRP-funded grants and awards is an important priority of the Alzheimer Society. As a recipient of the ASRP, support will be provided to help share the results from the research project to an audience that includes the Alzheimer Society Federation, the public, and people with lived experience. Further details will be provided to successful recipients in the notification of their award/grant.

2.19. Acknowledgments

Any communication relating to research conducted with the financial support of the ASRP must acknowledge the support of the Alzheimer Society and, where applicable, the co-funding partners. Copies of the communications should be sent to ASC as soon as they become available. Alzheimer Society logos and brand standard guidelines will be provided where appropriate.

2.20. Intellectual property

ASC and, where applicable, ASRP partners, do not wish to own or have a vested interest in intellectual property which may emanate from any of the research projects it is supporting. Neither does ASC wish to dictate terms to host institutions as to how they handle intellectual property. ASC does, however, insist that the host institution have a clear policy regarding intellectual property, and that such a policy be in force at the time any grant/award is made. ASRP-funded research is intended to contribute to the development of knowledge related to Alzheimer's disease and other dementias rather than the promotion of commercial interests.

3. Research program

3.1. Awards

3.1.1. Doctoral awards — \$129,000

These awards are offered for a period of **three years** and are available to students enrolled in or accepted into

a Canadian university-based program leading to a PhD degree. In the former case, students will be eligible if, at the time of application, they have been enrolled in a PhD program for 18 months or less. In the case that a student has transitioned directly from their bachelor's program to their PhD program, the student must be within 36 months of enrolling in their PhD program at the time of application. The value of a doctoral award is \$43,000/year, which includes a \$500/year research allowance, made out to the award recipient's supervisor.

The award application form on SurveyMonkey Apply (English: asc.smapply.ca / French: asc.smapply.ca/lang/?lang=fr) will provide the applicant with an opportunity to explain how the ASRP project proposal relates to their doctoral thesis. The ASRP Doctoral award is meant to act as a **salary award**, to assist the trainee in maintaining funding throughout their academic career.

Non-terminal Master's and combined MA or MN or MSc or MSW/PhD dual degree program students are eligible to apply for a doctoral award through the ASRP. If there are questions relating to the eligibility or timelines for applications for doctoral awards, please contact research@alzheimer.ca.

3.1.2. Postdoctoral fellowships — \$150,000

These awards are for graduates with a PhD or MD who wish to gain additional research experience, preferably in an established research environment in Canada that is not the one in which they gained their PhD or MD.

PhD postdoctoral applicants must be within 18 months of obtaining their PhD degree at the time of the application deadline. This stipulation may be extended if the post-PhD period included a significant medical or parental leave of absence, or if it was occupied by studies leading to a MD. Any questions or concerns with respect to the 18-month post-PhD timing should be directed to ASC.

Applications for a postdoctoral fellowship will not be accepted if the applicant has already received, or has completed, or is already in receipt of a postdoctoral fellowship or its equivalent.

Postdoctoral awards may be requested for a maximum of two years. Applicants who apply for a postdoctoral fellowship prior to their being awarded a PhD or MD degree must provide proof that such awards have been obtained before the start deadline for a postdoctoral fellowship. Applicants with a degree other than a PhD will normally be expected to have already undertaken some research training, and this is considered in evaluating the application. The value of a postdoctoral fellowship is \$75,000/year. These fellowship awards include a \$5000 research allowance directed to the recipient's supervisor.

3.1.3. Research allowance

Postdoctoral Fellows receive \$5000, this allowance is paid in two annual instalments of \$2,500 each. Doctoral Awardees receive \$500 per year. These awards will be issued to the supervisor in October of each year and may be carried over into the next funding year. If the award is not used in full by the end of the funding period, the remainder must be returned to ASC within 6 months following the conclusion of the award.

Eligible Expenses: The research allowance may be used to cover the cost of travel to scientific meetings and registration to attend conferences. Payments for research equipment such as tablets, emerging technology and specialized hardware/software not provided by the institution and necessary for the purpose of this project may be allowed. Payments for materials and research supplies such as glassware, chemicals, lab kits, etc. are also permitted.

Non-Eligible Expenses: Payments for computers of any kind, programs, printers, computer-related devices, telephones, and telephone-related charges are *not* accepted as allowable uses of the research allowance, *nor* are payments for servicing equipment, for consultation services, for expenses incurred or time subscribed by volunteer subjects participating in the research project, or for the stipend of the student.

3.1.4. ASRP/FRQ training awards

This program is a collaborative effort between Fonds de recherche du Québec (FRQ) and the ASRP. It aims to increase the number of doctoral and postdoctoral researchers who will be working on Alzheimer's disease and other dementias in Quebec. FRQ will co-fund the highest-ranking Québec candidates (from the doctoral and postdoctoral programs combined) selected for funding in the ASRP competition, that have also met FRQ's required score for funding in the FRQ's training grants competition. The program offers up to three years of support for Doctoral awardees and two years for Postdoctoral Fellows which can be renewed for one additional year by FRQ only if progress is deemed especially satisfactory. Stipends in this program are the same as those described above.

Candidates for these FRQ funding opportunities must submit applications both to FRQ and to the ASRP. Research supported under this Program must be carried out at a university or allied institution within the province of Québec.

Acknowledgments Any communication of research must acknowledge the ASRP and Fonds de recherche du Québec (FRQ) as sources of support. Copies of the communications should be sent to ASC as soon as they become available.

3.1.5. Information relating specifically to award applications

(i) Supervisors

- a) Supervisors may not sponsor more than **one** doctoral and **one** postdoctoral application in the same ASRP competition. In the event that two doctoral or postdoctoral awardees have indicated the same supervisor, the supervisor will be asked to choose only one application to be considered in the competition. In order to avoid disappointment, applicants are strongly encouraged to consult with their supervisor ahead of time regarding any other students they may be supporting in the ASRP competition.
- b) A supervisor may sponsor **two** doctoral or postdoctoral applicants only if they are sponsoring both applicants as a **co-supervisor**. If they are the sole supervisor for either applicant, the supervisor is only permitted to sponsor one trainee.
- c) Supervisors must provide a letter of support which contains a statement that the research project to be undertaken by the applicant will be funded for the period described in the application. If the project of the student/fellow is contingent on a source of funding of their supervisor, the supervisor must disclose this information, and the student's award must begin after the supervisor's funding begins. *No application will be accepted in the absence of such a letter.* Please note applicants with co-supervisors must include a letter of support from each supervisor.

(ii) All doctoral and postdoctoral candidates must:

- a) Write a statement supporting the likelihood that the training award could lead to a research career in Alzheimer's disease and other dementias.
- b) Ensure that all necessary authorizations from the supervisor and sponsoring department/university have been arranged prior to applying.
- c) Not concurrently hold another equivalent training award. Candidates must disclose receipt of additional awards received. Trainees must also state overlap between projects submitted to ASRP and other funding agencies.

(iii) Review criteria in determining the quality of award applications

The review panels focus on:

- a) The applicant's academic and research background. Undergraduate and graduate transcripts are required for doctoral awards only. Submission of foreign language transcripts must include official translations.
- b) The nature and quality of the proposed research, its presentation, and its relevance to Alzheimer's disease and other dementias. It is expected that the project described in the trainee's application will be presented in their own words. Any perceived overlap between the content in the application of the supervisor (if applicable) and the trainee will be considered plagiarism and will result in a withdrawal of the application.
- c) Two reference letters, **in addition to the supervisor's statement**. Reference letters must be from individuals who have supervised wholly or in part, or are very familiar with, the applicant's previous work. The supervisor cannot be listed as a reference. Letters of support will not be accepted in place of or in addition to the required reference letters.
- d) The track record of the proposed supervisor. A summary of the supervising investigator's supervisory experience must be uploaded as part of the supervisor's CV and include details of all trainees supervised over the last five years. While not a requirement, within the supervisor's list of publications, it is **recommended** that authors who are past or current trainees be highlighted in some way. It is strongly recommended that the trainee review the supervisor's CV before submitting it as part of their application. The supervisor's CV must be in the [Tri-Agency CV](#) format.
- e) The research environment where the applicant will work. Doctoral awards and postdoctoral fellowships are to be held in Canada.

It is strongly advised that the award applicant seeks the support and review from their supervisors prior to submitting their application. Applicants who seek assistance from supervisors are able to submit stronger, more fulsome proposals to the ASRP competition.

If a student and a supervisor submit the same project for ASRP funding, the roles must be carefully declared so that academic integrity can be maintained. Trainees must explicitly state how their project differs from their supervisor's. In the case that a similar project is funded through another source but is not supported by the ASRP, the trainee is still required to identify the difference between these projects and roles, to abide by ASC's policies of academic integrity.

(iv) Earnings from other sources

Awardees may work to a maximum of 10 hours per week or as allowed by their local institution as long as it does not interfere with the successful execution of their studies.

(v) Ineligible expenses related to postdoctoral fellows (PDFs)

Deductions for Canada Pension Plan (CPP), Employment Insurance (EI), provincial health taxes and benefits such as medical, dental, or private pension plans, are considered ineligible expenses and cannot be deducted from Alzheimer Society Postdoctoral Fellowship Awards, unless mandated by the Host Institution as a result of a formal agreement (e.g., unionization of PDFs).

3.2. Grants

3.2.1. ASRP New Investigator Operating Grants — \$200,000

The **New Investigator Operating Grant** is a prestigious funding opportunity designed to help launch the careers of outstanding researchers who are entering their first phase of an academic appointment. The intent is to help the grantee establish their laboratory and generate enough preliminary data to support fully competitive research grant proposals in national and international funding competitions.

Applicants must be within six (6) years of their first academic appointment and in a recognised Canadian institution at the application deadline date, and documentation must be provided from the institution to show that the applicant has been appointed to a salaried position that will continue for the duration of the grant. The six-year stipulation may be extended if the appointment was interrupted by a significant medical or parental

leave of absence. Proposals are invited in all areas of research that are relevant to Alzheimer's disease and other dementias. Applications for the New Investigator Operating Grants are **not permitted** to include co-investigators. Collaborators may be listed.

The ASRP will provide up to \$200,000 for a period of up to four (4) years. Brain Canada Foundation will co-fund up to two (2) successful applications. These grants are not renewable. The grant is strictly to support the research project operating costs. Recipients of past ASRP New Investigator grants are ineligible to apply for a New Investigator Operating Grant.

Acknowledgments: For grants co-funded by ASC and Brain Canada, any communication of research must acknowledge the ASRP and Brain Canada as sources of support. Copies of the communications should be sent to both organizations as soon as they become available.

3.2.2. Proof-of-Concept Grants — \$100,000

The Proof-of-Concept Grants program will favour applications that focus on challenging new directions in research into Alzheimer's disease and other dementias. The Proof-of-Concept Grant will support investigators with innovative, potentially high-challenge, high-yield exploration into dementia research. **The maximum amount awarded is \$100,000; the grant can be held for a maximum of three (3) years.** Brain Canada Foundation will co-fund up to nine (9) successful applications.

Principal investigators must hold a position equivalent to the rank of Assistant Professor or higher, in a Canadian research-intensive university. Adjunct professors at or above the level of Assistant Professor are eligible to apply. Each grant application must designate a principal investigator, who will be the administrative contact for the application and the grant, should the grant be awarded.

The Proof-of-Concept Grants program is looking to support applications that observe the following guiding principles:

- a) Applications must propose novel research questions that challenge the *status quo* in research into Alzheimer's disease and related dementias.
- b) Applications involving interdisciplinary teams are welcome, but the principal investigator must be an established researcher.
- c) While preliminary data are always helpful in determining the validity of any test hypothesis, the Proof-of-Concept Grants program will still consider research that is at the earlier stage of conception (little preliminary data if at all, or potentially unorthodox research rationale or approach).
- d) Also encouraged to apply to the Proof-of-Concept Grants program are researchers outside the field of Alzheimer's disease and dementia who are proposing novel research that applies to projects clearly relevant to Alzheimer's disease and other dementias.

Please note, Proof-of-Concept Grants were required to be pre-screened through a Letter of Intent (LOI) process to ensure they met the application requirements and met the eligibility of this specific funding opportunity in August of 2025. Only those applications that were deemed to be truly *proof of concept* (as defined above) were invited to submit a full application for peer review and review amongst citizen reviewers. Proof-of-Concept LOI guidelines and detailed requirements are provided in full on the SurveyMonkey Apply Resource Files page.

Acknowledgments: For grants co-funded by ASC and Brain Canada, any communication of research must acknowledge the ASRP and Brain Canada as sources of support. Copies of the communications should be sent to both organizations as soon as they become available.

3.2.3. Information relating specifically to grant applications

- a) Applicants cannot apply for more than **one** grant in total per competition, regardless of their role (e.g., individuals cannot submit one application as the principal investigator and another application as a co-investigator). However, applicants can be listed as collaborators on multiple applications.
- b) Doctoral students and postdoctoral fellows are not eligible to apply as principal investigators for research grants and cannot be listed as co-applicants.
- c) Co-investigators must meet the same eligibility criteria as that required for a principal investigator and are required to upload a [Tri-Agency CV](#). This requirement will be waived if a person with lived experience of dementia is applying as a co-investigator.
- d) Letters of collaboration must be provided as part of the application and must be on university/institution letterhead.
- e) In accordance with the policy of the Health Charities Coalition of Canada (HCCC), the ASRP does not fund indirect costs (i.e., costs associated with the administration of the grant and/or the maintenance of the lab – heating, lighting, etc.)
- f) Requests for equipment only will not be considered for funding. The application may include a request for equipment funds of up to \$5,000 per year. Payments for computers of any kind, programs, printers, computer-related devices, telephones, and telephone-related charges are *not* accepted as allowable expenses, nor are payments for servicing equipment or consultant services.
- g) Travel expenses from the grant must not exceed \$2,500 in any one year; *the purpose of the proposed travel must be for the purpose of the PI, as stated in the original application, and must be clearly relevant to the objectives of the research project being supported by the ASRP*. Travel expenses for study participants must be separately outlined within the budget form and budget justification within the application. Participant and partner travel, however, can be listed as a separate line item within the proposed budget, separate from the \$2,500/year expense.
- h) Applications may include a request for research technicians or assistants, whose rates of pay must be in accordance with the salary scales of the host institution. The roles of and justification for employing these individuals in the research project must be clearly and explicitly described in the application. The principal investigator (including New Investigator) and co-investigator(s) are not eligible to receive remuneration from funds provided by the ASRP.
- i) Costs are not transferable (i.e., if a requested expenditure in any one category is less than the allowable maximum, the difference cannot be used to supplement an expenditure requested for any other category).

4. ASRP partners

The ASRP is committed to a policy of partnership development in further strengthening its Training Awards and Research Grants Programs. ASRP is working closely with the following partners within this year's competition and is pleased to acknowledge their support.

Brain Canada Foundation (Brain Canada) is a national registered charity that enables and supports excellent, innovative, paradigm-changing brain research in Canada. For more than 25 years, Brain Canada has made the case for the brain as a single, complex system with commonalities across the range of neurological disorders, mental illnesses and addictions, and brain and spinal cord injuries. Looking at the brain as one system has underscored the need for increased collaboration across disciplines and institutions, and to ensure that Canada has a robust pipeline of talent to remain at the forefront in the field of brain research.

Société Alzheimer Society

The Canada Brain Research Fund (CBRF) is an innovative arrangement between the Government of Canada, through Health Canada, and Brain Canada Foundation, designed to encourage Canadians to increase their support of brain research, and maximize the impact and efficiency of those investments. CBRF supports the very best Canadian neuroscience, fostering collaborative research and accelerating the pace of discovery, to improve the health and quality of life of Canadians who suffer from brain disorders.

Fonds de recherche du Québec (FRQ) reports to the Minister of Economic Development, Innovation and Export Trade, and supports health research to foster the well-being of Quebecers. Its mandate is to promote and provide funding for research, to disseminate knowledge, and to contribute to training, as well as to establish partnerships crucial to the development of Québec's research and innovation system and its international reach. Website:

<https://frq.gouv.qc.ca/en/>

Research Manitoba (RM) is the provincial agency responsible for promoting, supporting, and coordinating the funding of research excellence and innovation in health, natural and social sciences, engineering and the humanities in Manitoba. RM supports local talent development by providing research support to early career researchers and graduate students, along with fostering strategic partnerships to strengthen research and innovation in Manitoba. Website: <https://researchmanitoba.ca/>

The Saskatchewan Health Research Foundation (SHRF) is the provincial agency responsible for funding, facilitating, and promoting innovative, collaborative health research in Saskatchewan, Canada. SHRF works as a catalyst, driver and leader to build and broaden the province's research knowledge; increase stakeholder engagement; generate new and diverse partnerships; and measure the impact of health research.
