Title of Study:

Creating robotic technologies together

Location: British Columbia

Study Description:

This study is being conducted by UBC researchers in the Neuroscience, Engagement, and Smart Tech (NEST) lab.

It is for Canadian adults 50+. You do NOT need any experience with robots to participate. The aim of this study is to gain a better understanding of attitudes of adults towards pet-like social robots.

The big picture goal of this work is to understand what would make robots for adults and older adults safe, ethical, and meaningful so that we can evaluate new technologies effectively.

Participate by visiting this link: bit.ly/UBCrobot

What will happen during the study?

Participants will complete an anonymous 20-minute online survey which will involve reading about pet-like social robots and answering questions about them.

Eligibility: Who Can Participate?

Canadian adults and older adults (50+)

Recruitment Start Date: September 24 2020

Recruitment End Date: December 24 2020
