

Title of Study: From Hospital to Home for Persons Living with Dementia: A Multi-Perspective Qualitative Study

Location: Canada-wide

Study Description:

This study aims to develop a theory outlining challenges and facilitators of care transitions built on the experiences of those living with dementia, their caregivers, and health care professionals involved in their care.

The data collected through this study will be used to build a theoretical understanding of the hospital to home care transitions. Such a framework could be used to elucidate the needs of patient-caregiver dyads and health care professionals and to inform future evidence-based policies and interventions to better support patients with dementia.

What Will Happen During the Study?

Participants will be asked to:

- Share their experience of transitioning from hospital to home [back into the community].
- Participate in a one-time interview by zoom/telephone for a period of 45 to 60 minutes.

Eligibility: Who Can Participate?

- Persons over the age of 65 living with dementia and/or
- Caregivers of persons over the age of 65 living with dementia

Recruitment Start Date: February 9, 2021

Recruitment End Date: September 8, 2021
