

Mission Statement

The Alzheimer Society of York Region's mission is to alleviate the personal and social consequences of Alzheimer's disease and other dementias and to promote research and education.

Vision Statement

We are committed to the care of families and the cure of Alzheimer's disease and other dementias. Through the care of our professional staff, active volunteers, valued partnerships and a supportive community, we have achieved excellence, innovation and leadership in the following areas:

- ◇ Family-Centred Services
- ◇ Advocacy
- ◇ Educational Awareness
- ◇ Fundraising Events

Charitable Registration# 10670 5429 RR0001

Alzheimer's disease

Alzheimer's disease is the most common form of a large group of disorders known as "dementias".

Alzheimer's disease is a progressive, degenerative, brain condition with no known cause or cure. It is characterized in the early stages by declining memory, judgment and learning ability; in the middle stages by personality changes with more pronounced loss of memory; and finally, a profound loss of all higher brain functions with the person affected requiring intensive nursing care.
