**Worried your loved one
may wander?**

Wandering doesn't have to be a worry.

The loss of memory impacts the ability of someone living with Alzheimer's to discern where they are. Scientists are not sure why dementia often leads to wandering.

The statistics are sobering. **About 50% of people who wander will suffer serious injury or death if they are not found within 24 hours.**

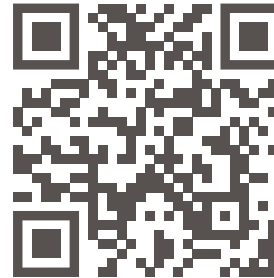

But there is hope with MedicAlert's **Safe & Found Program.**

A recent study of our data by a team of researchers at the University of Waterloo indicates that **in cases where MedicAlert was involved, 91% of individuals were returned home safe.**

Enroll your loved one in MedicAlert's **Safe & Found Program**, for just \$99.99 per year.
